Music Lessons page:

I have been teaching Jewish music for over 24 years. I teach Piano, Keyboard, Guitar, and Ukulele. I have developed my own teaching method that incorporates reading sheet music and developing the students ear. This combination leads to a student being able to reach a point where they can figure out melodies and chord structures on their own. It is very rewarding to see children and even adults learn an instrument. The benefits of the discipline of practice and developing ones mind musically can last a lifetime. Over the first 22 years I always taught my students in person. The past 2 years have shown a need for remote learning as well. I am available over Zoom now world wide. I have adapted my methods to the new technology and use innovative tools to enhance the learning experience.

Testimonials: ? as part of the music lessons page or a separate page?

Single page:

When someone writes a song they have a basic vision for how they want it to sound after being recorded. I couldn't have succeeded in this wonderful recording without the talents of other musicians and singers who have become friends over the years. Hillel Kapnik of Uptop Recording Studios where we recorded and edited the song and who lent his vocal talents as well as his guitar playing. Elimelech Adler a phenominal talent who sings and plays multiple instruments, in this case the Harmonica along with vocals which added so much to the track. Singers Yedidya Alper and Shlomo Golombeck who lent their talented voices to make this song a success.

This single is free to download and share.

I just ask that you include the credits on the cover art when sharing.

I am dedicating this song for a Refuah Shelaimah for Zev Tzvi Ben Chanah, my Father.

Album page:

Writing one song is a very special accomplishment writing 11 was something I never imagined being able to do. With Hashem's help when I was 24 years old I had written enough songs for an album. I decided the only way to do it and be happy with the way the songs come out was to produce it myself. I was able to get Yisroel Lamm the world famous arranger to agree to do the arrangements and along with the world class musicians he put together we ended up with a musical masterpiece. Whether you like music to Dance to, slow and Hartzig, Wedding songs, Shabbos songs, this album has it all. The arrangements, while current, still have a uniquely Jewish feel and that was what I tried so hard to accomplish. All the tracks are free to download and are free to share as well.

Home page:

Whether you are looking for music to listen to or are interested in music lessons or music for a Simcha. We have everything here in one website. Please visit each page to see and hear all the varied music I have worked on. Enjoy!

About page:

First and most importantly my family and I just made Aliyah in October of 2021! I had been playing and teaching music in Brooklyn for the past 24 years. It has been a real joy and pleasure to be able to make people's Simchas an evening of Dancing and Lovely melodies. Or see a child grow in his musical knowledge and gain confidence both in his music playing skills and life itself. I have with Hashem's help taught hundreds of students to play various instruments and it is one of the most rewarding things in my life. While I now live in Eretz Yisroel and won't be performing in the US, I am still available to teach music over Zoom. Not only in the United States, but worldwide. In Eretz Yisroel I am available for in person lessons in Ramat Beit Shemesh and Yerushalayim.

One of my greatest joys in life is playing music. I play the Piano, Keyboard, Acoustic guitar, and Ukulele. I have played at Weddings, Bar Mitzvahs, Vorts(Engagement parties), Sheva Berachos, Hachnosas Safer Torahs and other events as well. I am well known for making people's simchas lively, while playing at a comfortable decibel. My motto is "Your guests will enjoy singing and dancing, but won't leave hard of hearing!" Another unique feature I offer is a kumzits at your simcha, I bring my guitar and sit down with the boys at the end of a Bar Mitzvah or the Chosson's friends after a Wedding and lead them in Hartzig (soulful) melodies. It's a great way to end your simcha on a high note. I have also led Kumzits events and can be booked just for Guitar and Vocals.

I have a small home studio where I have recorded various small productions from demo CDs to camp recordings. One boy recorded some of his original compositions and gave out the CDs at his Bar Mitzvah.

I produced my album, Hodu L'Hashem in 2004. It is now available for free download on the Mendy's Album page. The songs are all my own compositions. Yisroel Lamm did the arrangements and they came out phenomenal! I had a lot of fun making the album and I hope you enjoy it, as well. You can also download for free my newest single release Hiney Anochi. It is on the New Single page.

I currently live in Ramat Beit Shemesh, Israel with my wife and four children.
